

IWI/DETER Quarterly Report – Barre District

Service Period: October 1, 2007 thru December 31, 2007

Number of re-arrests and technical violations	2 technical violations reported
Total number of women enrolled	10 women currently enrolled
Number of women entering program	1 new enrollee during the reporting period
Number of women engaged in types of treatment	O.P. 5 I.O.P. 7 Residential 1
Number of women actively engaged with self help/mentoring programs	none
Total length of time in treatment for women completing program this quarter	No women completed the Deter Project during the reporting period
Recidivism of rate at 6 months *	0
Recidivism of rate at 12 months *	0

* For the purposes of reporting, we consider the commission of a new crime for which the woman is charged and jailed as recidivism

Please comment on areas such as the following; where women went to live upon being released from jail, employment, educational achievements, reunification with their children, community engagement, building positive relationships, and living in drug-free safe environments.

Upon release one woman went to her own apartment.

All but one woman is working either part time or full time.

One woman re-established contact with her children, but is not living with them.

Please comment on program's impact on the community collaboration process and community professionals accessing available training about best practices with this population.

During the reporting period our core team added a member from the Family Center of Washington County who is also providing services to women in Dale.

Through our IWI team, we've kept people informed of local and statewide training and professional development events.

Our Deter Project continues to be supported through the Benefits Enrollment Initiative through Economic Services (DCF) and the Dale Facility. Activity for this portion of the project is low as the rate of women going to jail has slowed.

During the reporting quarter, we continued to develop our peer support efforts. We have a volunteer who is now establishing contact with the women and we hope in our next report we will have made some measurable progress.

We have not re-started our Journey Mapping portion of the evaluation and it's likely we'll not consider doing so, in part due to a lack of person power.
